

## DETAIL 1

## SPECIFICATIONS

### WINCH DESIGN TYPE

- electrically driven winch for deck installation on a vessel
- pulling force: up to 35.0t
- rope speed: 0 to 18m/min step-less control
- rope diameter Ø36mm
- rope capacity: ca. 60m incl. four safety windings
- electric motor: 132kW (IP56) totally enclosed, non-ventilation
- required power supply: 380V / 3ph / 50Hz

### Scope of Delivery

- winch with electric motor, gearbox, frequency control and brake
- Control cabinet

### CORROSION PROTECTION

- 50µm zinc phosphate
- 190µm primer + PU dry film thickness
- or equivalent corrosion protection

## Documentation

- in English language: one (1) hard copy and one (1) soft copy (PDF)
